PROFESSIONAL SUMMARY

Systems Analysis and Development student with hands-on experience in freelance projects and IT support. I build responsive interfaces and web applications using HTML, CSS, JavaScript, PHP and MySQL. Seeking to contribute to a development team through a structured approach, attention to usability and continuous learning.

TECHNICAL SKILLS

Web development: HTML5, CSS3, JavaScript, PHP and MySQL.

Projects and learning: Python (Tkinter and FastAPI), SQLAlchemy, JSON and Node.js/Express.

Tools and foundations: Git, GitHub, responsive interfaces and UX/UI fundamentals.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

Nov 2025 - Present

• Developed web applications for customer records, service organization and process management.

• Created scheduling solutions and responsive interfaces, focusing on data organization and usability.

IT Intern | Lakatos

Duration: 8 months

• Provided technical support to users and resolved day-to-day IT issues.

• Assisted with system maintenance and organization, as well as administrative and technology-related tasks.

SELECTED PROJECTS

Salon Management System | PHP / MySQL

Modules for customers, services, staff, appointments and financial records.

To-Do List | JavaScript / LocalStorage

Task editing, completion, filters and browser-based persistence.

Barcode API | Python / FastAPI / SQLAlchemy

API learning project with product creation, listing, lookup and deletion.
